ABOUT ME

Full-stack developer with experience building MERN-based web applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, Tailwind CSS, Clerk, JWT, Redux Toolkit, and REST APIs. Built end to end projects with authentication, role-based access, payments, dashboards, responsive UI.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Aug 2023 - Aug 2027

Quantum University, Roorkee, Uttarakhand

Class 10th & 12th, Science(PCM)

Mar 2020 & Mar 2022

R.D. International Academy, Saharanpur, Uttar Pradesh

SKILLS

LANGUAGES: HTML, CSS, JavaScript (ES6+), TypeScript, C++, Python.

FRAMEWORKS & LIBRARIES: React.js, Redux Toolkit, Context API, Tailwind CSS, Shadcn UI, Framer Motion, React Hook Form, Node.js, Express.js, REST APIs, JWT Authentication, Clerk Authentication, Role-Based Access Control (RBAC), Zod Validation.

DATABASE & TOOLS: MongoDB, PostgreSQL, Git, GitHub, Postman, VS Code, Cloudinary, Stripe, Vercel, Leaflet.js, OpenStreetMap, Nominatim.

PROJECTS

[AroundMe](#) | (may/2026 - ongoing...)

[Link](#) | [Code](#)

- Built a full-stack event discovery platform where organizers can create organizations and post events across 3 categories (Hackathon, Workshop, Cultural events), with Clerk authentication, role-based access control, and 15+ protected routes.
- Engineered location-aware event discovery using OpenStreetMap, Leaflet.js, and Nominatim Geocoding to store coordinates in MongoDB, implemented Mongoose transactions, and Architected 6 Redux Toolkit slices to cache event, organization, and dashboard data, cutting redundant API calls by ~40% and reducing re-navigation load time from ~800ms to under 200ms.
- TECH STACK: React.js, Redux Toolkit, Tailwind CSS, React Hook Form, Zod, Node.js, Express.js, MongoDB, Mongoose, Clerk, Cloudinary, Leaflet.js, Nominatim — deployed on Vercel.

[CoursEz](#) | (feb/2026 - apr/2026)

[Link](#) | [Code](#)

- Engineered a full-stack LMS supporting dual roles (educator/student) with Stripe payment integration and webhook-driven enrollment — handling course creation, progress tracking, and earnings analytics across 3+ protected role-based routes.
- Implemented Clerk authentication with webhooks and 4+ protected routes for role-based access (student/educator), integrated Stripe payment gateway (INR) with webhooks for enrollment confirmation, and handled Vercel deployment challenges including routing and redirect fixes.
- TECH STACK: React.js, Context API, Tailwind CSS, Node.js, Express.js, MongoDB, Clerk, Stripe, — deployed on Vercel.

[AllJobPortal](#) | (dec/2025 - jan/2026)

[Link](#) | [Code](#)

- Built a full-stack job portal where recruiters must register a company before posting jobs, and students can search by title/description, filter by location, industry, and salary range, apply with a resume upload, and track application status in real time.
- Secured the platform with JWT + RBAC covering recruiter and student workflows — enabling companies to post jobs, manage applicants, and accept/reject candidates via a dedicated dashboard with Redux Persist for session continuity.
- TECH STACK: React.js, Redux Toolkit with Redux Persist for session continuity, Node.js, Express.js, MongoDB, JWT.

ACHIEVEMENTS

- Solved 350+ DSA problems across LeetCode, GeeksForGeeks, and CodeStudio across major algorithmic categories [codolio](#)
- Ranked 39th on the GeeksforGeeks University Leaderboard based on DSA problem-solving.

COURSEWORK

Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming.
